

	Event Loft	Galerie
09:30	Opening	
09:45	Really crazy container troubleshooting stories <i>Gianluca Borello</i>	Introducing Bluetooth Mesh <i>Marcel Holtmann</i>
10:30	Rust memory management <i>Zeeshan Ali</i>	High-performance Linux monitoring with eBPF <i>Alfonso Acosta</i>
11:00	Incremental Adoption of Open Services with Habitat <i>Blake Irvin</i>	Network troubleshooting in heterogeneous clouds <i>Yvain Afchain</i>
11:15	Break	Break
11:30	Azure networking integration challenges <i>Stephen Hemminger</i>	Getting Started with Habitat <i>Jamie Winsor</i>
12:15	Lunch	Lunch
13:45	systemd @ Facebook — a year later <i>Davide Cavalca</i>	The IoT botnet wars, Linux devices, and the absence of basic security hardening <i>Drew Moseley</i>
14:30	State of the rkt container runtime <i>Iago López Galeiras</i>	Cockpit: A Linux sysadmin session in your Browser <i>Stef Walter</i>
15:00	Portals, dynamic permissions in Flatpak <i>Alexander Larsson</i>	Reproducible Builds - where do we want to go tomorrow? <i>Holger Levsen</i>
15:45	Containers: What Did We Learn? <i>Eric Myhre</i>	Building containers all day <i>Cornelius Schumacher</i>
16:00	Break	Break
16:15	Fix, forget, or forge a new path? <i>Brian 'redbeard' Harrington</i>	Using systemd for containers @ Facebook <i>Zeal Jagannatha, Zoltan Puskas</i>
17:00	Streamlining systemd's code and safety <i>David Strauss</i>	Landlock LSM: Towards unprivileged sandboxing <i>Michael Schubert</i>
17:30	A gentle introduction to [e]BPF <i>Michael Schubert</i>	Software updates for connected Linux devices: key <i>Drew Moseley</i>
18:00	Containers without a Container Manager, with systemd <i>Lennart Poettering</i>	Securing Home Automation with Tor <i>Kalyan Dikshit</i>
