	Event Loft	Galerie
09:30	Opening	
09:45	Really crazy container troubleshooting stories *Gianluca Borello*	Introducing Bluetooth Mesh *Marcel Holtmann*
10:30	Rust memory management *Zeeshan Ali*	High-performance Linux monitoring with eBPF *Alfonso Acosta*
11:00	Incremental Adoption of Open Services with Habitat *Blake Irvin*	Network troubleshooting in heterogeneous cloud *Sylvain Afchain*
11:15	Break	Break
11:30	Azure networking integration challenges *Stephen Hemminger*	Getting Started with Habitat *Jamie Winsor*
12:15	Lunch	Lunch
13:45	systemd @ Facebook — a year later *Davide Cavalca*	The IoT botnet wars, Linux devices, and the absence of basic security hardening *Drew Moseley*
14:30	State of the rkt container runtime *Iago López Galeiras*	Cockpit: A Linux sysadmin session in your Browser *Stef Walter*
15:00	Portals, dynamic permissions in Flatpak *Alexander Larsson*	Reproducible Builds - where do we want to go tomorrow? *Holger Levsen*
15:45	Containers: What Did We Learn? *Eric Myhre*	Building containers all day *Cornelius Schumacher*
16:00	Break	Break
16:15	Fix, forget, or forge a new path? *Brian 'redbeard' Harrington*	Using systemd for containers @ Facebook *Zeal Jagannatha, Zoltan Puskas*
17:00	Streamlining systemd's code and safety *David Strauss*	Landlock LSM: Towards unprivileged sandboxing *Michael Schubert*
17:30	A gentle introduction to [e]BPF *Michael Schubert*	Software updates for connected Linux devices: key *Drew Moseley*
18:00	Containers without a Container Manager, with systemd *Lennart Poettering*	Securing Home Automation with Tor *Kalyan Dikshit*
